Entsorgung des Altgerätes:
Disposal of the old device:
Mise au rebut de l'ancien appareil :
Smaltimento del vecchio apparecchio:

Das auf dem Typenschild vorhandene Symbol der durchgestrichenen Abfalltonne zeigt, dass das Produkt unter die Richtlinie 2012/19/EU fällt. Am Ende der Lebensdauer dürfen so gekennzeichnete Altgeräte nicht mit dem Hausmüll entsorgt werden, sondern sind bei einer gesonderten Entsorgungsstelle abzugeben. Die Abgabe ist für Sie kostenlos. Durch die Abgabe leisten Sie einen Beitrag zum Umwelt- und Ressourcenschutz, da enthaltenen Wertstoffe einer Wiederverwendung zugeführt werden.

The crossed-out wheeled bin symbol on the type label indicates that the product is covered by Directive 2012/19/EU. At the end of its service life, old appliances marked in this way must not be disposed of with household waste, but must be handed in at a separate disposal point. The disposal is free of charge for you. By submitting your waste, you make a contribution to the protection of the environment and resources, as the recyclable materials it contains are reused.

Le symbole de la poubelle barrée d'une croix sur la plaque signalétique indique que le produit est couvert par la directive 2012/19/EU. A la fin de leur durée de vie, les appareils usagés ainsi marqués ne doivent pas être jetés avec les ordures ménagères, mais doivent être déposés dans un point de collecte séparé. La mise à disposition est gratuite pour vous. En soumettant vos déchets, vous contribuez à la protection de l'environnement et des ressources, puisque les matières recyclables qu'ils contiennent sont réutilisées.

Il simbolo del bidone della spazzatura barrato sulla targhetta indica che il prodotto è coperto dalla direttiva 2012/19/UE. Al termine del loro ciclo di vita, i vecchi apparecchi così contrassegnati non devono essere smaltiti con i rifiuti domestici, ma devono essere consegnati in un punto di smaltimento separato. Lo smaltimento è gratuito per voi. Con l'invio dei rifiuti si contribuisce alla tutela dell'ambiente e delle risorse, poiché i materiali riciclabili in esso contenuti vengono riutilizzati.

D

Leuchtengläser besitzen einen hohen Anteil an Handarbeit. Herstellungsbedingt kann es dadurch zu Luft- oder Partikeleinschlüssen oder leicht abweichender Optik kommen (z.B. der Lackierung, Ausformung). Auch ist eine unterschiedliche Wandungsstärke möglich, was zu einem nicht ausgewogenen Gewichtsverhältnis im Glas führt. Eine dadurch bedingte leichte Schiefstellung, z.B. bei Pendelleuchten ohne Ausgleichsmöglichkeit, ist daher normal. All diese genannten Punkte sind ein Erkennungsmerkmal für ein individuell gearbeitetes Produkt und stellen keinen Mangel dar.

GB

Luminaire glasses have a high proportion of manual work. Due to the manufacturing process, this can lead to air or particle inclusions or a slightly different appearance (e.g. the paintwork, molding). Different wall thicknesses are also possible, which leads to an unbalanced weight ratio in the glass. A slight misalignment caused by this, e.g. in the case of pendant lights without the possibility of compensation, is therefore normal. All of these points are a distinguishing feature of an individually manufactured product and do not represent a defect.

F

Les verres des luminaires ont une forte proportion de travail manuel. En raison du processus de fabrication, cela peut entraîner des inclusions d'air ou de particules ou un aspect légèrement différent (par exemple la peinture, le moulage). Différentes épaisseurs de paroi sont également possibles, ce qui conduit à un rapport de poids déséquilibré dans le verre. Un léger désalignement causé par cela, par exemple dans le cas de suspensions sans possibilité de compensation, est donc normal. Tous ces points sont une caractéristique distinctive d'un produit fabriqué individuellement et ne représentent pas un défaut.

I

I vetri degli apparecchi d'illuminazione hanno un'alta percentuale di lavoro manuale. A causa del processo di produzione, ciò può portare a inclusioni di aria o particelle o ad un aspetto leggermente diverso (ad es. la vernice, lo stampaggio). Sono possibili anche diversi spessori di parete, il che porta a un rapporto di peso sbilanciato nel vetro. Un leggero disallineamento causato da ciò, ad esempio nel caso di lampade a sospensione senza possibilità di compensazione, è quindi normale. Tutti questi punti sono una caratteristica distintiva di un prodotto fabbricato individualmente e non rappresentano un difetto.
